Mission

The Fight AIDS Foundation *raison d'être* is:

- To offer outstanding **medical healthcare and human support** to people living with HIV.
- To conduct **independent and competitive research** in the field of HIV and infectious diseases.
- To share **knowledge transfer** between other health professionals and general public.

Vision

The Fight AIDS Foundation intends to reach a number of goals in the upcoming years:

- To maintain our position as a reference centre (at a scientific and healthcare level).
- To fulfill the expectations of our patients, guaranteeing their continuity.
- To be agile in producing innovative and high-quality scientific output.
- To consolidate our current research and services lines, promoting the interaction between them and with external groups.
- To obtain the necessary resources that would enable us to work independently.
- To consolidate teaching programs for external professionals.
- To actively transfer our knowledge to society.
- To have well-trained, satisfied and professionally accountable employees.
- To participate in cooperation programs in developing countries.

Values

- We aim to be **close, welcoming, supportive** and **available** to the people who need us.
- We believe in **respecting people** and their **right to confidentiality**.
- We are a **multidisciplinary, experienced** and **professional** team.
- We pursue **excellence**, we **innovate** and we **lead** in our field.
- We have self-management capacity; we are **versatile** and **flexible**.
Quality Politics of the Fight AIDS Foundation

The Fight AIDS Foundation is committed to carry out its task with the highest quality standards, understanding that this is the only way to approach healthcare, research and education in HIV infection.

The Fight AIDS Foundation communicates its policies to its members. All its members know and share their commitment that, according to our Mission, implies:

- Offering the best **multidisciplinary healthcare**, exceeding our users’ expectations.
- Developing **quality research** for making progress in the control and eradication of the HIV infection.
- Training **professionals** who are able to follow which task both inside and outside our organization.

In order to advance fulfilling these objectives and continuing improving, we need trained, satisfied and motivated professionals who are offered all the resources available to perform their task.

The Fight AIDS Foundation considers that:

- It is appropriate in its purpose and context
- Supports its Strategic Plan
- Provides a framework for the Quality Objectives
- Complies with the requirements of interested parts
- Complies with applicable legal and regulatory requirements
- It is committed to continuously improving its Quality Management System (QMS)

The Quality Policy Manual is available on the website www.flsida.org for relevant stakeholders and is kept in the QMS as documented information.
